Wanted: Head of Software (Full-Stack Software Engineer)

stenon offers the world's first real-time soil analysis solution for agriculture. With our IoT solution consisting of intelligent sensor fusion, artificial intelligence and data analysis, we are solving a major and global agriculture problem.

Are you ready to disrupt the world's largest market together with us and our patented technology?

We are looking for a Head of Software to take our codes to unicorn level and beyond. For this we need your expertise as a Full-Stack Software Engineer.

We have already acquired initial funding from EIT Climate-KIC, Europe's leading climate innovation initiative. Also, we have landed e-shelter, the largest provider of data center services in the EU, that operates data centers of >100.000 m^2 total area, as a technology partner, giving us access to tremendous computing and emulation power. This gives you ultimately the opportunity to impact and scale our technology-stack based on the best infrastructure in the world. We are also member of the Google Could Platform startup program, which provides us with a 20.000 EUR Google Cloud service grant for developing our infrastructure.

If you are interested in using your contribution to our technology to solve a global problem in the agricultural sector and at the same time do good for the global environment, get in touch with us.

What we are looking for
- Experience as a full-stack SW developer, able to code back-end to front-end
- Very good knowledge in Python and Java/JavaScript
- Gifted for writing clean and easily maintainable code
- Experience with Google Firebase and related App development
- Experience with Google Cloud Solutions and architecture design
- Entrepreneurial mind-set and a 'get-shit-done' attitude

We are not looking for a regular employee but rather for a highly-driven member of our initial founding team.
It's okay if you don't have years of experience listed on your CV. What we need is drive and the will to turn a vision into reality.

What we offer:
- A key role in a fast-paced early stage company that puts people first
- The opportunity to build and shape a high performing Dev-Team
- Equity depending on the type and extent of your support
- Freedom in how you solve problems – It's the result we care about
- A culture where the best argument wins

We look forward to receiving your email.
